Summary

Computer Information Systems student with hands-on experience in cybersecurity operations, incident response, vulnerability management, identity and access management, and enterprise security reporting. Experienced with Microsoft Defender, SentinelOne, Microsoft Entra ID, Power BI, phishing investigations, and security operations in an enterprise environment. Seeking opportunities in security operations, incident response, vulnerability management, or security engineering.

Education

University of Houston, Cullen College of Engineering

Expected December 2027

Bachelor of Science in Computer Information Systems, GPA 3.6

Houston, TX

- Relevant Coursework: Information Security, Cloud Computing Architecture, Information Systems Infrastructure, Web Application Development, Advanced Information Systems Development, Project Management
- Activities: MISSO, FITP

Experience

Cactus Wellhead

June 2026 – Present

Cybersecurity Intern

Houston, TX

- Investigated and triaged security incidents involving phishing emails, malware detections, DNS security alerts, and suspicious authentication activity using Microsoft Defender, SentinelOne, Critical Start, Entra ID, ADAudit, and Abnormal Security
- Built and maintained Power BI reporting solutions integrating security and asset data from SentinelOne, Tenable, NinjaOne, Intune, Entra ID, Active Directory, Halo ITSM, and ThreatLocker
- Supported the migration from Duo MFA to Microsoft Authenticator and Windows Hello for Business by validating user enrollment status, device assignments, and authentication readiness
- Created and improved incident response runbooks covering phishing investigations, malware response, DNS alerts, and Microsoft 365 security events
- Conducted asset visibility and remediation analysis to identify unmanaged devices, security coverage gaps, and endpoint compliance issues

Council Cultural Activities

August 2023 – December 2024

Council Liaison

Houston, TX

- Managed secure communication channels for 20+ UH organizations, ensuring accurate and consistent information flow
- Coordinated access and event workflows, reducing scheduling conflicts and planning errors by enforcing structured processes

Projects

Enterprise Asset Security Dashboard | *Power BI, Entra ID, Intune, SentinelOne, Tenable, Active Directory, Halo ITSM, ThreatLocker*

- Developed an enterprise security dashboard providing visibility across 1,600+ managed endpoints
- Consolidated security and asset data from multiple platforms into a centralized reporting solution
- Enabled identification of unmanaged assets, protection gaps, and remediation priorities through interactive reporting

Honeypot & SIEM Labs | *Microsoft Sentinel, Wazuh, VMware, Ubuntu, Windows 10, KQL*

- Deployed SIEM environments with Windows and Linux endpoints to monitor simulated attacks
- Configured log collection, file integrity monitoring, vulnerability detection, and MITRE ATT&CK mapping

AWS Scalable 3-Tier Web Application | *AWS (EC2, RDS, S3, Lambda, VPC)*

- Designed and deployed a secure 3-tier cloud computing architecture on AWS using EC2, RDS, S3, and Lambda across public and private subnets within a custom VPC
- Configured Application Load Balances and Auto Scaling Groups to ensure high availability and fault tolerance under varying traffic conditions
- Implemented security groups, route tables, and IAM policies to enforce network segmentation and least-privilege access across all application tiers

Technical Skills

Security: Microsoft Defender XDR, SentinelOne, Microsoft Sentinel, Abnormal Security, Critical Start, Tenable, VirusTotal, Incident Response, Vulnerability Management

Identity & Endpoint Management: Entra ID, Active Directory, Intune, Windows Hello for Business (WHfB), Microsoft Authenticator

Data & Reporting: Power BI, Power Query, Excel, SQL, PowerShell
